

In an unprecedented incident on 15.12.2016, a gentleman entered the school academic area, and without seeking any permission from the school authority started filming and photographing the classrooms.

The students and the teachers of the pre-primary classes were out for sports then, and hence, the pre-primary gates were open and accessible. It is told that the person even brushed aside objections raised by an ayah and a teacher.

The school authority finds this act extremely objectionable as schools (especially with growing girls around) is an extremely sensitive place to be filmed. Government circulars have strictly prohibited unauthorized use of cameras and cell-phones inside the school.

We earnestly request the parents to cooperate in such matters, so that such incidents in future can be avoided.
